

Salt Lake County Special Sanitation District Private Road Agreements

Salt Lake County provides curbside residential refuse and recycle collection on public streets within the Service District boundaries. Residents on private roadways may obtain refuse and recycle collection through curbside containers or dumpsters through a Private Road Agreement. All private roads must meet minimum standards before receiving service. *Please note that 100% of residents on a private must agree to and sign the Private Road Agreement.*

Salt Lake County does not provide refuse collection to commercial locations unless a private hauler is unwilling or unable to provide the service.

Private Road Requirements

1. 100% of residents on a private road must sign and agree to the private road requirements
2. Sanitation operators have the discretion not to enter roads as weather or other conditions dictate.
3. The road's grade, banks, and curves permit safe and efficient operations.
4. The roadway provides 14.5 feet width and 14.5 feet height clearance
5. Roads must have ample turn-arounds sufficient in size to accommodate regular Sanitation Division equipment or a straight-through exit. Drivers cannot use private driveways for turn-arounds.
6. Roads must have enough space in the turn-around to minimize the need for backing up. Drivers will only back up once per road and not for an extended distance. Drivers will never back out of a private road onto a public street or other road.
7. Roads must be regularly maintained and plowed and have adequate surfaces able to handle heavy equipment without causing damage to the equipment.
8. Trees, shrubs, and landscaping must be trimmed to 14.5 feet above road surface.
9. The Sanitation Division will determine can placement. Garbage and recycle cans will not be placed under any overhanging objects including, but not limited to, trees and basketball hoops.
10. Garbage cans and recycle cans will be properly placed 4 feet apart and 4 feet away from fences, walls, trees, and cars.
11. Cars will be parked off the street so as not to obstruct Sanitation equipment.

If you live on a private road and are requesting Salt Lake County sanitation services, please contact us at 801-562-6435 for more information.
